

## ITS Asset Viewer Unveiled at ITS-America Meeting in Nashville

At the Annual Intelligent Transportation Association of America (ITS-A) meeting held in Nashville on April 22 - 24, the U.S. DOT unveiled the new ITS Asset Viewer that uses visual mapping technology to identify locations of specific ITS deployments by type. Mike Schultz and Steve Gordon worked with their U.S. DOT Joint Program Office (JPO) sponsor James Pol to provide demonstrations during the meeting (see photo below). Resultant press included inclusion in the Secretary of Transportation's Blog as well as the Research and Innovative Technology Administration newsletter.
